

# $35/4$ square meters by $7/2$ meters

## Answer 1

Answer: Area =  $35/4$  m<sup>2</sup>

Length =  $7/2$  m

Area = length \* width

$35/4 = 7/2 * \text{width}$

$7/2 * \text{width} = 35/4$

width =  $35/4 \div 7/2$

width =  $35/4 \times 2/7 = 5/2$

Width =  $5/2$  m
